

2026 PREFERRED ACCESS DRUG FORMULARY AND PHARMACY BENEFITS GUIDELINES

This Formulary Guide is effective as of January 1, 2026, and is subject to periodic updates as new medications and prescribing information become available. Please note that this guide does not provide a comprehensive list of all available medications. Variations in coverage may occur based on individual employer benefit plans.

If a prescribed medication is not listed in this guide, members are encouraged to contact Member Services or consult with a network pharmacy to determine coverage levels. Real-time cost information for individual medications is also available through the member portal at www.usrxcare.com/member.

Formulary consultation and administrative support are available through US-Rx Care Member Services at **855-700-4854**. The US-Rx Care Formulary outlines the copayment tier status for the medications most commonly prescribed to our members.

For information regarding benefit coverage or dispensing restrictions, please refer to your benefit plan documents or contact Member Services.

Coverage tiers are defined as follows:

Tier 1: Most generics and some brands

Tier 2: Preferred brands and some generics

Tier 3: Non-Preferred brands and some generics

Tier 10 (ACA drugs): Covered at \$0 copay as required by the Affordable Care Act

We recommend keeping a copy of this Formulary Guide accessible when meeting with your healthcare provider, particularly when prescription medications may be required as part of your treatment plan.

DRUG NAME	STRENGTH	FORM	PA	QL	TIER
ABILIFY MAINTENA	300MG	PRE-FILLED SYRINGE FOR INJECTION	Yes	Yes	3
