PBM Regulations by State

National and State Level Regulatory Requirements Specific to Pharmacy Benefit Management

State: Nebraska

Last Updated: 10/20/2026

Applicable Rule(s)

Neb. Rev. Stat. § 44-4604 established under the Pharmacy Benefit Manager Licensure and Regulation Act governs the licensing and oversight of Pharmacy Benefit Managers operating in the State of Nebraska. The statute requires any person or entity providing claims processing services or other prescription drug or device services for a health benefit plan to hold a valid license issued by the Nebraska Department of Insurance (DOI).

Compliance Statement

The Pharmacy Benefit Manager maintains the required Nebraska Pharmacy Benefit Manager license pursuant to Neb. Rev. Stat. § 44-4604 and maintains the license through the applicable annual renewal process. The organization ensures continued operational alignment by immediately notifying the Director of any material ownership or control modifications, updating maximum allowable cost (MAC) price lists every seven days, and upholding strict compliance with consumer choice, anti-spread pricing mandates, and specialized pharmacy access standards.
