

# \$0 COPAY

## SPECIALTY MEDICATIONS

# SYNOVUS<sup>®</sup>

**ScriptSourcing** is a supplement to your prescription drug benefit. They can provide many specialty medications for a **\$0 copay**. These specialty medications must be determined medically necessary and require prior authorization through our pharmacy benefit administrator, **US-RX Care**.

A **member advocate** from ScriptSourcing will contact you if you take a medicine that meets the initial qualifications. They will verify that you meet the requirements to enroll, and will assist you with the application and enrollment process.

**Once approved**, you will receive your medication from a manufacturer designated pharmacy at **no cost**.

For members choosing not to participate in these programs to access eligible medications for **no cost**, your out-of-pocket cost will **increase to 75%** of the cost of the medication **up to a maximum of \$10,000 per fill**. Any such increase will not count toward any plan deductible or out-of-pocket maximum.

Please note that your **ScriptSourcing advocate** will ask about your household income to search through various programs on your behalf.

You must provide the requested information to your **ScriptSourcing advocate**.

Eligibility is based on household size and income, so information requested may include:

**Driver's License**

**Paystubs**

**Proof of Address**

**Tax Returns**

After you contact your advocate at **ScriptSourcing**, an override will be placed in the system that allows you to receive your medication from a **manufacturer designated pharmacy**.

Your **ScriptSourcing** advocate will send you paperwork to complete, and you **MUST** return it by the specified deadline.

Your **ScriptSourcing advocate** will help you determine your eligibility and transition your medication from your current pharmacy to the new MAP pharmacy for **\$0!**

**THE APPROVAL PROCESS  
MAY TAKE UP TO 6 WEEKS**
