

COPAY ASSISTANCE DRUG LIST

Attached is a list of medications currently included in the US-Rx Care Copay Assistance Program. As of the date this list was created, the drug manufacturers offer copay assistance or coupon programs to help lower the cost of these medications.

If you are prescribed a medication that qualifies for the US-Rx Care Copay Assistance Program, a US-Rx Care representative will contact you by phone to assist with enrollment in the manufacturer's program. This process typically reduces your out-of-pocket cost to \$0, or in some cases to a manufacturer-required minimum amount – usually, though not always, \$25 or less. You will never pay more than your plan copay when enrolled in a manufacturer assistance program.

Please note that all copay assistance availability and any required minimum out-of-pocket amounts are determined by the drug manufacturers, not by US-Rx Care, and are subject to change at the manufacturer's discretion.

To confirm whether a medication is currently part of the US-Rx Care Copay Assistance Program, or to verify the current manufacturer-required minimum out-of-pocket amount (if applicable), please call 877-200-5533.
